## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 6, 2004 has been entered.

### ***Response to Amendment***

2. Receipt of a Declaration under 37 CFR 1.132 filed on December 6, 2004 is acknowledged. The Declaration is sufficient to overcome the rejection of claims 1-13 and 15-30 under 35 U.S.C. 103(a) as being unpatentable over Huang et al. (US 5,062,896) in view of Hanrahan (US 5,945,217).

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1773

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-13 and 15-30 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 2, 4, 6, 8-14 and 16 of Application No. 10/071,743, allowed on February 9, 2005. Although the conflicting claims are not identical, they are not patentably distinct from each other..

Allowed claims 1, 2, 4, 6, 8-14 and 16 of Application No. 10/071,743 recite a thermal interface material comprising a phase change polymer, a solder material having a melting temperature of between 100 and 250°C and thermally conductive non-fusible particles. The claims of the instant application recite a thermal interface material comprising a polymer matrix material wherein the matrix may be phase change material (claims 4), solder particles having a melting temperature below a temperature of 300°C and filler particles having a melting temperature above the melting temperature of the solder particles.

Accordingly, it would have obvious to one of ordinary skill in the art to select solder particles having a melting temperature below a temperature of 300°C given that the allowed claims of Application No. 10/071,743 recite a solder material having a melting temperature of between 100 and 250°C.
